REPORT

RELATING TO THE REGISTRATION OF

BIRTHS, MARRIAGES AND DEATHS

IN THE

PROVINCE OF ONTARIO

FOR THE

YEAR ENDING 31st DECEMBER

1935

(BEING THE SIXTY-SIXTH ANNUAL REPORT)

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 13, 1936

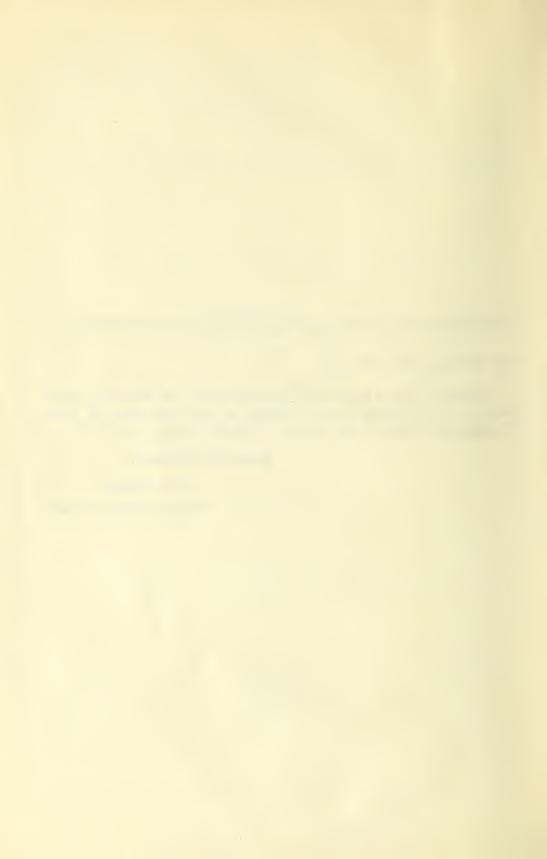

To His Honour the Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Sixty-Sixth Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1935.

Respectfully submitted,

H. C. NIXON,
Registrar-General of Ontario.

SIR:

I have the honour to submit for your approval the Sixty-Sixth Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1935.

I have the honour to be, Sir,
Your obedient servant,

F. V. JOHNS,

Deputy Registrar-General.

To the Hon. H. C. Nixon,

 $Registrar\hbox{-} General\ of\ Ontario.$

The population is distributed as follows:-

City municipalities, 1,590,216; Towns (over 5,000 population), 193,259; Rural (including all other municipalities), 1,812,525.

BIRTHS

There were registered 63,069 living births during the year 1935, being a rate of 17.5 per 1,000 of population. While this allows for a numerical increase of 835, the number is so small as to leave the rate unchanged, i.e., it is the same as for the preceding year.

There were 32,367 boys, or 51.3% of the total number; and 30,702 girls, or 48.7% which represents 105.4 male to 100 female births.

In the case of illegitimate births 77.2% of the mothers were under 25 years of age and of the total 2,642 such births, 1,368 or 51.8% were boys and 1,274 or 48.2% girls.

MULTIPLE BIRTHS

There were 768 cases of twin births. Of these 761 were males and 775 females.

There were 7 cases of triplets, 16 boys and 5 girls.

Table 15 will give a detailed explanation of the multiple births.

TUBERCULOSIS

The deaths from Tuberculosis for 1935 were 1303 which is slightly less than one half of those in 1905, while the rate, 36.2 per 100,000 of population, is but 31.5% of the rate thirty years ago.

The following Table showing deaths and rates over a fifty year period is shown for comparison and indicates the effectiveness of effort to wipe out this disease.

The death rate from puerperal causes is the lowest in the statistical history of Ontario, being a fall of 12.5% of the rate for 1934. The rate for the cities is increased by 11.67% and the towns by 1.3%; the rural has fallen by 61.5%. Much of this increase in the cities and towns may be due to the number of non-resident mothers seeking hospitalization from the rural municipalities surrounding such cities and towns.

SUICIDES

In 1935 there were 367 suicides. The rate per 100,000 of population was 10.2, just 0.01 more than for 1934.

Of these, 280 or 76.29 were males and 87 or 23.70 females.
